

# What Others are Saying About Cancer's Cause, Cancer's Cure by Morton Walker, D.P.M

*"I bought the Kindle version of the book. I am a bit of speed reader so I was able to get through a lot of it in a short time last night. The book tends to get a bit technical but you sure explain Dr. Beljanski's findings very well. He thinks the cause of cancer and its rise for the same reason I do. It's the compounding effects of many different pollutants, additives in our food, exposure to radiation from a multitude of sources, pesticides on and in our food that affect the very DNA of our cells and the list goes on. He certainly presents a convincing case for the cause and cure of cancer. A source for the herbals mentioned in the book can be had from at least one source. I found this one: <http://www.natural-source.com/engl/home.php> There is a whole chapter or so in the book dealing with an "anti-cancer diet" that seems to jive with many others that I have seen such as Elaine's, the owner of this group page. I would recommend this book to anyone as I found it very informative and goes off in directions that most have not heard of, right down to the cell DNA level.*

*Live long, live healthy. Cancer CAN be cured without destroying the body with dangerous radiation or body destroying chemotherapy. Cancer is no longer a "death sentence" as it CAN be cured. Dr. Beljanski's findings is one more proof of that. It gives us all hope."*

*"I am thrilled to see published Dr. Walker's excellent book on the life and work of Mirko Beljanski PhD, a truly innovative, courageous and brilliant scientist and human being. I am very pleased to have originally introduced Dr. Walker to Dr. Beljanski's wife Monique and daughter Sylvie soon after Dr. Walker had attended my lecture on Beljanski's work back in 2003. As is apparent from the contents of this book, this*

**Hugo House Publishers - 3361 W. Monmouth Ave., Englewood, CO 80110**

**[www.hugohousepublishers.com](http://www.hugohousepublishers.com) 877 700-0616**

*introduction led to the Beljanski's sponsoring Dr. Walker's further research into the life and work of Dr. Beljanski and the writing and publication of this long awaited book.*

*Dr. Walker strikes an excellent balance between presenting Dr. Beljanski's insights and scientific concepts with the political and economic forces that have prevented this work from becoming better known. The theme of how political and financial forces tend to suppress valuable scientific concepts that arise from using natural substances as opposed to patentable synthetic medications applies to the work of Beljanski and many others even today.*

*I think this suppression of valuable information that may interfere with profits is one of the main reasons that the health care system today is in such a sorry state today. Dr. Beljanski's emphasis on adverse environmental factors playing a major role in the development of disease and his focus on preventing adverse health events are necessary today, as we continue to live under the reign of an expensive and poorly functioning health care system.*

*Dr. Walker is to be congratulated for writing this very readable, interesting and provocative book about Mirko Beljanski, one of the great scientists and pioneers of recent times."*

- **Michael B Schachter MD, CNS (Certified Nutrition Specialist) Suffern, NY**

---

*"Dr. Walker is a well-respected medical writer with over 30 years track record of highlighting new and also forgotten medical innovation. In his latest text Dr. Walker presents the sad case of Mirko Beljanski PhD another pioneering cancer researcher who was broken on the wheel of the corrupt system of "politically correct science".... Dr. Mirko Beljanski's insights as to the damage and repair of DNA at the heart of tumour genesis is the meaty truth reported in this story of man, medicine, personal sacrifice, cancer, intellectual bias, and the triumph of truth...at long last."*

**Dr Ronald Klatz MD, DO**

Co-Founder/President-American Academy of Anti-Aging Medicine.

---

*"Dr. Morton Walker has done it again; bringing to light the brilliant work of the late Dr. Beljanski on botanicals, and their proven synergy with chemotherapeutic agents. This game changer can best be summed up in the question all readers of this book will be*

asking themselves: "Does it really matter how we kill cancer cells, as long as they are dead?"

- **Maureen Long, Founder/Owner of Camelot Cancer Care Inc.**

---

*"In his new book, Cancer's Cause Cancer's Cure, Dr. Morton Walker reports on exciting new discoveries about cancer, uncovered by Dr. Mirko Beljanski, microbiologist at the Pasteur Institute. A respected medical journalist, Dr. Walker relates the saga of Dr. Beljanski's life's work and his discovery of powerful botanical agents that kill cancer cells. Dr. Walker's book is sure to have a lasting impact on both mainstream and holistic medical communities and all who have a stake in understanding and, at last, curing the leading health issue challenging researchers today – Cancer".*

- **Craig Keeland, C.E.O. ViaViente Global, Plano, TX USA**

---

*"I'm a poster child for Beljanski's botanicals. I feared the worst when my doctor told me that I had a PSA count of 19. My doctor told me it was almost certainly prostate cancer, and it had probably metastasized. I found out about these remedies through Hugo House Publishers. I was skeptical, but I took them. Six weeks later my PSA count was down to 7. Then then it slipped to 5 and has stayed there for over a year."*

- **Rod W. from Denver, CO**

*"It seems there are always more books to read and more information about cancer healing. Here is one I urge you to get and read. I got it on my Kindle a couple of weeks ago from Amazon and read it in two days.*

*"The author is Morton Walker. I know Morton. He is a prolific health author and journalist. Morton has had a lot of cancer experience in his family. He is 82 years old and had been "retired." He has written 91 previous. books on cancer and lots of other health topics. In the introduction to this book, he says that this, his 92nd book, is more important to any reader than all 91 of his previous books -- combined!*

*"Morton came out of retirement when he began studying Dr. Mirko Beljanski and his amazing cellular research and his isolation of natural healing substances. I can certainly understand him doing that. When I first read of Beljanski's work about 15 months ago, I became fascinated with it, too. In fact, one of the principal products developed as a*

*result of Beljanski's research has healed my enlarged prostate problems starting a year ago. It is called Prostabel.*

*"Dr. Beljanski died in 1998. He was 75 years old. He died in jail in France. He had been prosecuted because the research results he had after 45 years of research conflicted with the dogma of the French conventional medical "industry." Beljanski had discovered new information about the DNA and RNA activity in our cells. It was contrary to the dogma that DNA was the dominant source of information in our cells and all information started with it. Beljanski found that RNA affected the DNA of cells and changed it in what is now called "reverse transcription." The RNA, of course, is affected by our lifestyle choices, among other things.*

*"Beljanski spent 30 years at the Pasteur Institute in Paris researching cellular biology. He was an absolute independent in his research. His major conflict with the Department Head at Pasteur, who was one of the primary proponents of the dogma above, caused Beljanski to leave Pasteur. He then spent another 15 years doing his own research with private funding until his lab was raided by the French authorities and he was jailed in 1997. Shortly before this, France's President Francois Mitterand had been healed of his prostate cancer when one of his doctors provided him with Beljanski's substances. Beljanski became too visible and was shut down -- similar to many cases in the U.S.*

*"Morton Walker, the author of the "Cancer's Cause, Cancer's Cure" book, was approached in 2006 by Monique Beljanski, Beljanski's wife and Sylvie Beljanski, his daughter. They invited him to the annual meeting of the group in France called CIRIS, which is composed of about 4,000 cancer patients healed using Beljanski's substances. Morton was thoroughly impressed at the wide variety of cancers these people had overcome and their many years of complete healing.*

*"Monique and Sylvie Beljanski brought Beljanski's research papers to New York after his death. Monique had worked with him in his research for all 45 years. They soon founded a company in New York to put his research into products and sell them to the world. The company is called Natural Source International. Their website is [www.Natural-Source.com](http://www.Natural-Source.com).*

*"The reason I'm recommending that you read Morton Walker's book is because he has compiled the most complete description I've seen of Beljanski's research and why it is so effective at healing cancer of all kinds.*

*"Before you order the book, I suggest you go to the Beljanski Foundation's website. There you'll find many testimonials organized by type of cancer (lots of different types).*

You'll find some information on Beljanski's work and some Frequently Asked Questions (FAQs). The website is <http://beljanski.com/eng/>.

*"If you are as fascinated as I am with this man and his work, I strongly suggest you get this book. It will give you a better understanding of cancer -- how it happens and how we get over it than any other book I've read (and I've read a lot of them).*

*"Some of you may recall a Web Talk Radio interview I did about a year ago with Dr. Stephen Coles, MD, PhD from UCLA. His book on Mirko Beljanski's research and his life is also very interesting. It is called "Extraordinary Healing" and is also available from Amazon, etc.*

*"I have no financial interest in the Beljanski products. Natural Source is a sponsor of my web talk radio show. As a result, they offer you a 20% discount on your first order if you mention my name -- either online or on the phone."*

*"When I received a copy of Dr. Morton Walker's fascinating book, I was very pleased. After all, our patient advocacy group had invited him to speak about his work back in 2008, at our very first educational cancer conference.*

*We pride ourselves on presenting information that is not heard everywhere, but we wish the information from this book could be. It is a fascinating story and represents real possibilities for dealing with cancer. Dr. Beljanski was a true pioneer and clearly a genius. It's terrific that his story is being told so well."*
