# WINNING THE WAR ON CANCER

## The Epic Journey Towards a Natural Cure

President Nixon signed the “War on Cancer” into law in 1971. Nearly half a century and hundreds of billions of dollars later, it looks like we are still fighting a losing battle. Or are we?

What if a natural solution had been discovered, but had just been overlooked by the pharmaceutical industry due to lack of profit potential?

When a new, natural and non-toxic way to address cancer is being discovered, it is a game-changer that does not go unnoticed in the scientific community. But instead of being hailed and embraced, it is fiercely opposed by prominent scientists with strong ties to the pharmaceutical industry and the might of the government is called upon to the rescue, to perpetuate a failing model that contributes to losing the war on cancer.

A new breakthrough book, *Winning the War on Cancer: The Epic Journey Towards a Natural Cure* reveals the visionary discoveries of a French scientist whose suppressed research led to improvements in the prevention and treatment of cancer...naturally and without toxicity.

### Story of Dr. Mirko Beljanski

This book is a “story within a story” as through its pages, Sylvie Beljanski, the daughter of Mirko Beljanski, PhD, outlines a personal journey of discovery of her father’s new, and promising, paradigm for the treatment of cancer. This tale unfolds against the backdrop of the French establishment, determined to obliterate the findings of the world’s first green molecular biologist, one who spent over 40 years studying the environmental impact on DNA replication and transcription.

“When my father, a biologist-biochemist who worked for many years at the famous Pasteur Institute in Paris, started to rethink the origin of cancer and find new solutions in order to develop molecules able to selectively block cancerous cell multiplication without killing healthy cells, he ran into major opposition,” remarks Sylvie. “The conventional oncology community ostracized him, despite the fact that his theories on cancer were aimed at complementing chemotherapy and radiation, not replacing them.”

This ostracization, however, did not prevent Francois Mitterrand in 1993, then President of France, from turning

*Whether a current patient or caregiver, a survivor, a researcher, an author/speaker, or a physician, the information in this book is ground-breaking, exciting, and essential to know.*

*- Annie Brandt, Survivor/Thriver, Founder & President Emerita, Best Answer for Cancer Foundation*

to Beljanski during his battle with an advanced prostate cancer. Against all conventional wisdom, Mitterrand's failing health improved, and he was able to complete his second term as President. Powerful people became infuriated because a natural, alternative treatment had thwarted Mitterrand's prognosis and thus robbed them of the opportunity to seize power. So, when Mitterrand ultimately died about 18 months after he left office, the French government brutally shut down Beljanski's laboratory and mercilessly persecuted him. Shortly thereafter, Beljanski became ill without access to his own products to save his life.

Mirko Beljanski, PhD, was arrested in 1996, stripped of most of the freedoms usually granted by the French constitution and never given a chance to have his day in court to defend himself. He died in 1998 before a hearing date was set by the Judge. Sylvie Beljanski, a member of the French bar, took the case to the European Court of Human Rights for absence of due process. The case was won four years later.

#### ***Dr. Mirko Beljanski's Legacy Lives on Through The Beljanski Foundation***

With her father's passing, Sylvie embraced her father's mantra: "When we have the power to help, we have the duty of doing so."

Fulfilling a promise to carry on her father's legacy, The Beljanski Foundation, a non-profit organization in New York City, was founded in 1999. Its mission to further Dr. Beljanski's research by researching natural compounds with anticancer potential is being conducted within a network of prestigious institutions, including Columbia University Medical Center, Kansas University Medical Center, and Cancer Treatment Centers of America®.

Sylvie's journey was truly one of defiance, hope, despair, personal growth and love that reveals:

- What it was like to piece together her deceased father's work and to regenerate his research and results to help people today
- How Dr. Beljanski's findings can help people who are undergoing cancer treatments
- How we can harness the power of nature to fight disease, particularly by using the Pao pereira and Rauwolfia vomitoria extracts

- How Sylvie Beljanski fought the French government—and won
- The injustice done to her father, first by the Pasteur Institute in Paris where he had worked and then by a government smear campaign
- The link between "toxic body, toxic mind" including environmental toxins, heavy metals, stress, toxic people and their link to cancer
- The "power of one" to move outside of their comfort zone to carry on for the greater good

#### **Meet the Author**

Stop by The Beljanski Foundation booth on Sunday 4/29/18 for an exclusive opportunity to meet and have your book signed by author Sylvie Beljanski!

To order or learn more, visit:

[www.winningthewaroncancer.com](http://www.winningthewaroncancer.com)

or call 646-808-5583.

**Authors proceeds from the sale of this book will go to The Beljanski Foundation, a 501(c)(3) non-profit organization, to help fund anticancer research to cure cancer the natural way.**

#### **About The Beljanski Foundation**

**The Beljanski Foundation** is a 501(c)(3) nonprofit organization based in New York City. The overall mission of The Beljanski Foundation is to study and share knowledge of effective non-toxic natural answers that work both alone and in synergy with traditional western medicine. These values, at the very core of integrative medicine, are the legacy of Mirko Beljanski, PhD (1923-1998), the French biologist who uncovered the link between environmental toxins and carcinogenesis when he was working at the Pasteur Institute in Paris.
