

ANNUAL REPORT 2023

Beljanski

THE BELJANSKI FOUNDATION

WORKING TO CURE CANCER THE NATURAL WAY

MISSION & VISION

The Beljanski Foundation was created to continue the pioneering work of French biologist **Dr. Mirko Beljanski (1923–1998)**, who first uncovered the connection between environmental toxins and cancer.

Our mission is to **study and share evidence-based, non-toxic natural approaches to cancer** and other chronic diseases. We support research at respected academic institutions and make the findings publicly available so patients and doctors can explore safe, integrative options alongside conventional medicine.

The Beljanski Foundation is a registered **501(c)(3) nonprofit organization** based in New York City dedicated to advancing integrative medicine and bringing hope through science.

LETTER FROM OUR FOUNDER

Dear Friends of The Foundation,

I would like to extend a heartfelt thank you to all who support The Beljanski Foundation's programs and donate to our organization. Your generosity allows us to continue funding research on natural compounds and uncovering new ways to fight cancer and other degenerative diseases.

Since its founding in 1999, The Beljanski Foundation, a 501(c)(3) nonprofit organization based in New York City, has partnered with respected academic institutions such as Columbia University and Kansas University Medical Center.

Together, we have advanced research on prostate, ovarian, pancreatic, and other cancers. Studies have shown the benefits of natural extracts such as Pao pereira, Rauwolfia vomitoria, green teas, RNA fragments, and a specific Golden Leaf of Ginkgo Biloba extract.

All of this work builds on the discoveries of Dr. Mirko Beljanski, whose groundbreaking research revealed the role of environmental toxins in the onset of disease. Each project we fund is designed to be rigorous, resulting in peer-reviewed publications that are shared with the public through our website, www.beljanski.org.

What makes our research unique is that it is driven not by profit but by purpose. Natural compounds cannot be patented, so pharmaceutical companies have no incentive to study them. Yet we believe Mother Nature is worth studying, and nothing will stop us from uncovering and sharing this invaluable information.

LETTER FROM OUR FOUNDER

There is a wealth of health benefits associated with a natural approach to wellness, especially when facing serious diseases like cancer. This makes it essential that our research is conducted with the highest scientific standards at reputable academic institutions. Once completed, these findings are published and made available to empower patients and healthcare providers to explore natural compounds as part of integrative treatment options.

Finally, we remain committed to advancing fairness and sustainability. The regular export of natural compounds not only provides valuable materials for research but also supports education, economic development, and environmental stewardship in the communities where these plants grow.

Thank you for your continued generosity. It is only through your support that we can pursue this mission and bring hope through science.

Sylvie Beljanski

FOUNDER & PRESIDENT

WHAT WE DO AT THE FOUNDATION

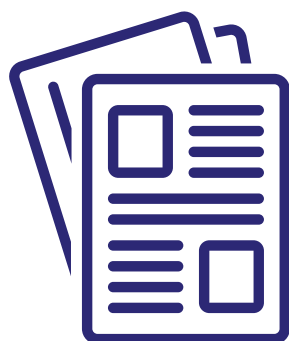

Fund Research

Fund ground-breaking research that affirms and builds on the work of Dr. Mirko Beljanski, who is published in 133 peer-reviewed scientific articles and wrote two books and numerous patents.

Educate the Public

Spread awareness of Dr. Beljanski's discoveries of effective non-toxic natural answers to cancer and other chronic diseases that work both alone and in synergy with traditional western medicine.

Carry on Dr. Beljanski's Legacy

Spread awareness of Dr. Beljanski's discoveries of effective non-toxic natural answers to cancer and other chronic diseases that work both alone and in synergy with traditional western medicine.

THE BELJANSKI PARADIGM

Our environment contains a multitude of chemical compounds from two hundred years of industrialization. As life expectancy has improved, our bodies are exposed to an even greater number of compounds that enter our cells, weaken our immune systems and destabilize our DNA. The result is inflammation, cancer and other chronic diseases.

Mirko Beljanski, PhD (1923-1998), was one of the first scientists to discover the direct link between environmental toxins and DNA damage. He demonstrated the destabilizing effect that carcinogens exert when they bind to DNA and found that this altered form of DNA was found in all cancer cells. He went on to identify plant extracts that specifically target destabilized DNA and thus prevent the growth of cancer cells, without being gender or organ specific. These extracts, Pao pereira and Rauwolfia vomitoria, have now become the subject of extensive scientific research from numerous academic institutions.

Beljanski's plant extracts and RNA fragments are powerful natural products that help provide protection from damaging elements in our environment as part of a holistic approach to wellness. With the support of The Beljanski Foundation, Dr. Mirko Beljanski's initial research has attracted the attention of prestigious American scientific institutions that have conducted research using Beljanski's extracts. All of these studies have been published in peer-reviewed journals and are available on our beljanski.org.

RESEARCH UPDATES

Each year, The Beljanski Foundation funds and supports cutting-edge research at respected academic institutions. Our studies build on the discoveries of Dr. Mirko Beljanski, exploring how natural compounds can help fight cancer and other chronic diseases. All findings are published in peer-reviewed journals and made available to the public at beljanski.org/publications.

Long COVID Clinical Trial

What's being studied

- RNA fragments developed by Dr. Mirko Beljanski
- Known to stimulate bone marrow to produce healthy immune cells and platelets

Why it matters

- Long COVID patients often struggle with immune imbalance, low platelets, and fatigue
- RNA fragments may help restore immune balance and improve quality of life

What's measured

- Platelet and immune cell counts
- Fatigue, cognition, and daily activity levels
- Overall health improvements

Melanoma & Ginkgo Golden Leaf Extract

What's being studied

- Golden Leaf Extract of Ginkgo biloba (GGLE)
- Investigated for its ability to inhibit melanoma growth and spread

Why it matters

- Melanoma is one of the most aggressive and deadly skin cancers
- Current treatments can be highly toxic and not always effective
- GGLE shows potential as a safe, natural therapeutic option

What's measured

- Tumor invasion and angiogenesis (new blood vessel formation)
- Biomarkers linked to cancer progression
- Anti-cancer activity in both lab and animal models

EDUCATING THE PUBLIC

Through events, webinars, interviews and media outreach, we continue to share knowledge and inspire healthier choices worldwide.

26

Events

49

Media Features

Thousands

Reached Worldwide

Notable Highlights

- Successfully launched the inaugural **Beljanski Integrative Cancer Conference** in Jacksonville, FL.
- Conference funding supported groundbreaking **research on breast cancer stem cells**.
- Expanded outreach through monthly Healthy Tuesdays & Jeudis de la Santé events.
- Featured in major health media, including the **cover of Natural Awakenings Magazine**.

TESTIMONIALS & PERSONAL STORIES

The Beljanski Foundation's work is best reflected in the voices of those whose lives it has touched. From patients and caregivers to health professionals and partners, their stories remind us why our mission matters.

"There is no resistance phenomenon...the disease has not returned. I'm 57 years old, a healthy grandfather of four, no longer getting sick — no colds, no flu, nothing."

Gérard W.

"The Beljanski approach has had a significant positive impact not only on my clients' health, but also on my own. It is a trusted choice I am proud to share with my community."

Dr. V.

"At 70, my PSA climbed to 39. I turned exclusively to Beljanski's extracts. Now, at 93, I'm still healthy, active, and president of the Happy Retirees Club."

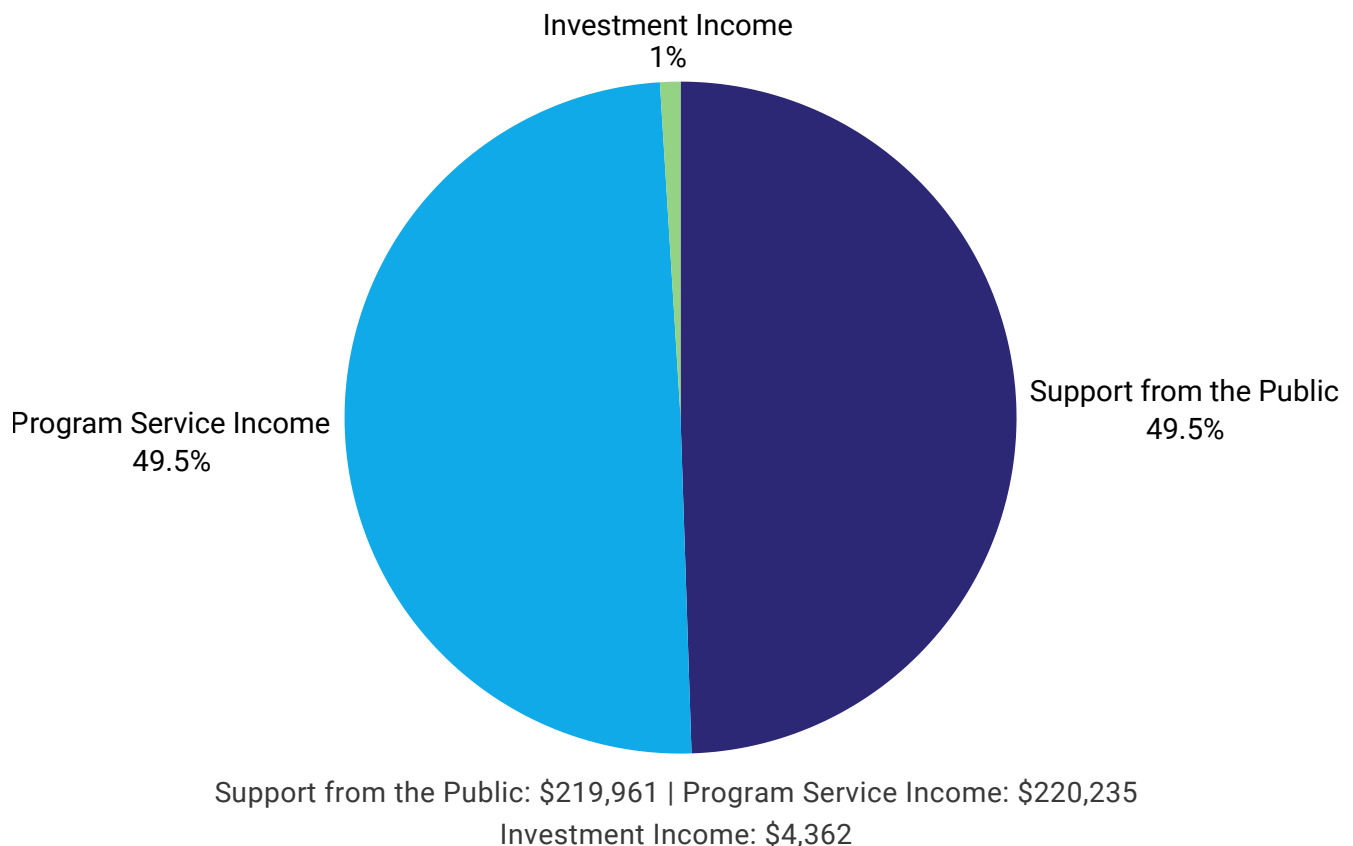

Jean M.

WHEN YOU DONATE

How your generosity fueled our work in 2023

Your support funds groundbreaking research, educates the public about Dr. Beljanski's discoveries, and ensures his legacy lives on. We are deeply grateful for every dollar you contribute to our mission.

💙 **Total Revenue: \$444,972**

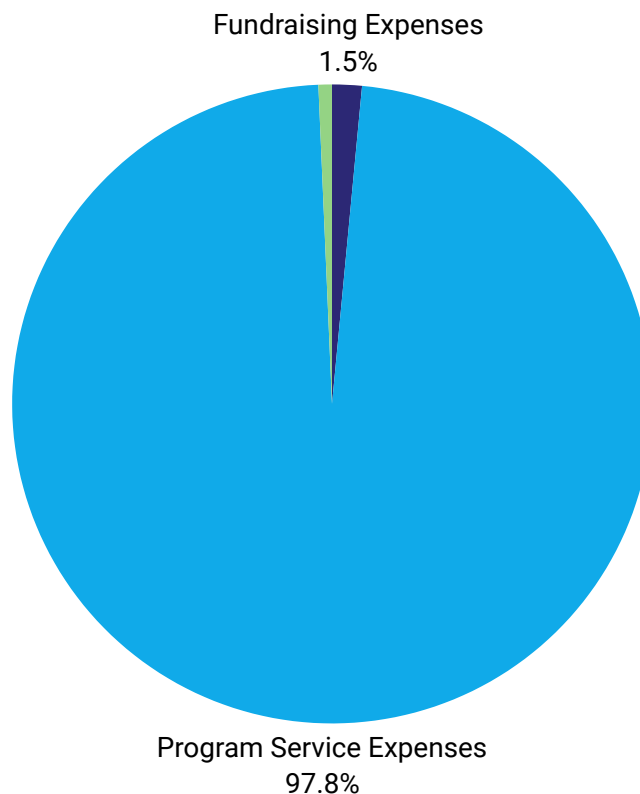

WHEN YOU DONATE

How your support was invested

What makes us different: when you donate, your gift directly funds research and we publish and share those findings so the whole world benefits.

Total Expenses: \$324,731

Fundraising Expenses: \$4,871 | Program Service expenses: \$317,652
Management and General Expenses: \$2,208

OUR LEADERSHIP & PARTNERS

The Beljanski Foundation is guided by dedicated leaders and supported by valued partners. To view the most current list of our Board of Directors, Advisors, and Partners, scan the QR codes below.
